

DIY CRAFTSHOP

<http://www.howtomakeabooksafe.com/basic-book-safe-instructions.html>

1. Open your book past the first few pages and clip/rubber band them out of the way
2. Place your template guide along the top left of your book
3. Hold the template down firm and use the exacto knife to cut around the inside of the template
4. Pick up the cut pages and remove the pieces
5. Secure the finished pieces to the left of the book so they are out of the way
6. Repeat sept 3 until the book safe is cut out to the depth of most of the pages. You will want to leave the last five pages uncut.
7. Use plastic wrap, wrap the first five pages and the last five pages to protect them from the Modge Podge/Glue solution
8. Use a paint brush to spread the Modge Podge/glue solution around the exterior and the interior of the book safe
9. Allow five minutes to dry before adding another coat
10. When home, place heavy objects on top of the closed book safe and allow to dry for 24 hours
11. Enjoy!
