

Makers Advisory Lightning Talk
Camila Harris
Oregon Reference Summit 2019 Presentation

**Makers Advisory
Hillsboro Public Library**

**Let's talk about
Makerspaces...**

Makerspaces are social gathering spaces that encourages creativity, invention, innovation, and experimentation.

So how do I help?

The first few steps should feel familiar.

- 1. identify the current inspiration.**
What are they working on?
- 2. identify the scope of work.**
Are they on a deadline?
Does their project have a focus?
- 3. identify the next steps.**
What are they missing?

Here's where some expertise comes in handy.

**Introduce them to
your Makerspace.**

**Find software or
materials that will
help them complete
their project.**

**Help them connect
with other
makerspaces.**

Thank You!
